Function-Wall™

Modular Laminate Wall System

“Sustainable Solutions for Healthcare”

Nurse Stations

Patient Areas

The use of Function-Wall in this IV Therapy area proves to be an excellent solution. With high impact wall tiles that are easily cleaned and maintained. Modular components that are reconfigurable to function in many different ways to create a truly sustainable product line. One of which being a glass window kit that can quickly convert any solid wall tile to a window opening making Function-Wall a smart choice for any facility.

Nurse Stations

Whether it is new construction or the renovation of a live patient area, Function-Wall is the fastest, easiest, and most efficient way to install a new Nurse Station. With modular components, pre-drilled wall studs and high impact removable wall tiles Function-Wall gives end users a far superior solution to conventional mill-work or systems furniture. Designed specifically for healthcare, Function-Wall is not only built to last it is made to adapt to the ever-changing medical environment.

Office Solutions

Function-Wall once again proves to be the superior solution for the modular office space. This project had some interesting requirements to meet. The customer needed a quick easy clean setup of a two-window check-in desk installed in a historic building that could not damage the buildings restored condition. In addition, they plan to move to a new space within the year. The Function-Wall system allows them to take full advantage of its modular components and reuse them later. With multiple options and components that include snap-on access panels, pass-through windows, and full height locking access doors, Function-Wall was able to create the perfect space for this modular office solution.

Office Solutions

Patient Areas

Why?

- Reconfigurable
- Repairable
- Cleanable
- Impact Resistant
- Removable Panels
- Pre-Cut Wire Chase
- Fast & Clean Setup
